Subject: Adaptive Cruise Control - Freightliner Cascadia w/ Cummins ISX12N Engine

Dear Customer,

Our records show that your Freightliner Cascadia, equipped with a Cummins ISX12N engine and Wabco OnGuard system, may be affected by a software issue impacting the Adaptive Cruise Control (ACC) functionality.

To address this, Cummins has released a new software update to restore optimal performance. Please contact a Cummins certified service location at your earliest convenience to schedule this update.

Thank you,
Warranty Campaigns Department
