

Intermittent Connections and ECU Fault Codes

Topic Background:

- Affected models: Freightliner eCascadia, Cascadia, Fifth Gen Cascadia, eM2, Western Star 47X, 49X
- Symptoms may include intermittent connections, grounding, and other wiring related issues
- This issue is detectable through issues like vehicle not starting, ICU messages, and telltale lamps.

Topic Resolution Info:

- Improved electrical connection verification procedures at plants
- Additional PDI steps added

Progress Updates:

- Continuing to gather fault code field data
- Fix as fail
