- Concern regarding both rear seats cannot be adjusted simultaneously, and the zero-gravity or upright seat mode is canceled when the other rear seat is moved.
- Concern regarding passenger display issues where rear-seat video playback and screen status were shown incorrectly when the rear screen was folded and powered off.
- Implemented functional improvements in FFAI
- Implemented functional improvements in FFNAV

-

PROCEDURE

1. Determine the vehicle's current software (sw) integration level:

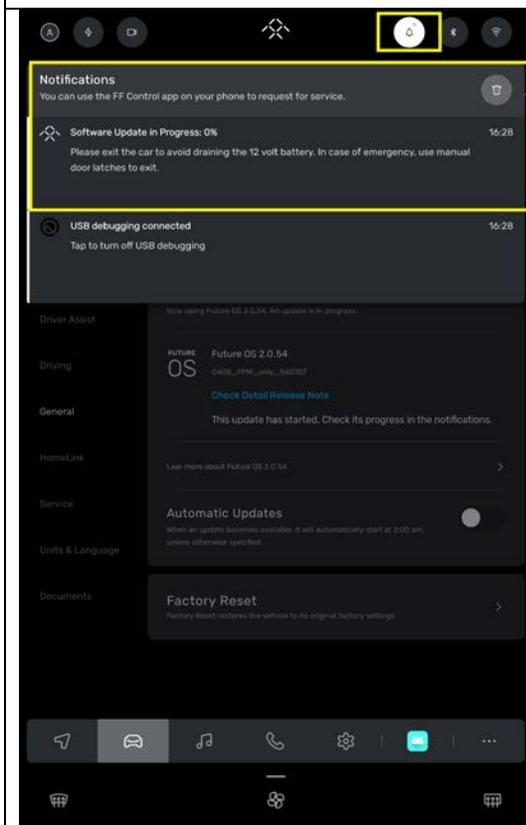

2. When a new software update is "pushed" to the car, "Software Update Available" notification may be displayed during the next vehicle start-up.
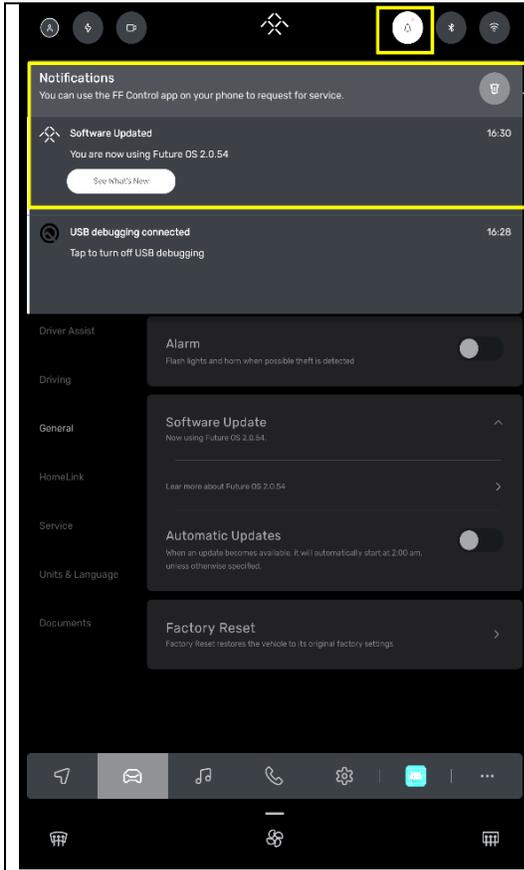

3. Software level is found by selecting:

a. on the bottom tool bar
b. Settings
c. General
   Vehicle SW level will then be displayed.

4. If the current software level is v2.0.58 or lower, proceed to update the vehicle.

5. "System Update in Progress" notification will be displayed showing the progress %.

6. Once the update is complete, "Software Updated" notification will be displayed.
