

# Chassis – Fifth Gen Cascadia

## Topic Background:

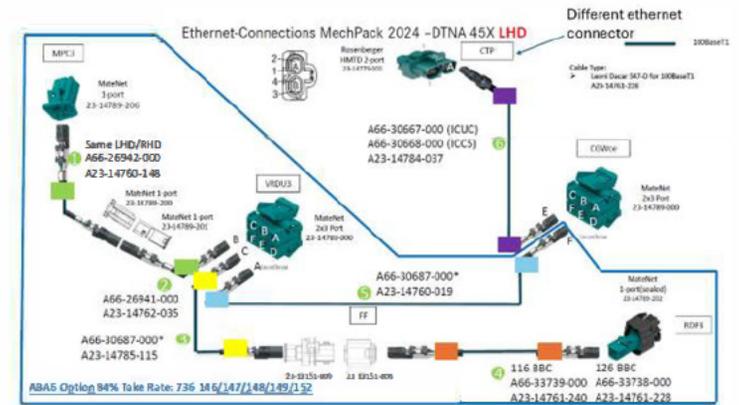

1. Product launch process helping to identify improvement opportunities

## Topic Resolution Info:

1. Ethernet cables – colored tape added now, future to wrap by color – VRDU, CGW, MPC, RDF
2. CGWce Symptoms Diagnostics being developed – no CGWce faults today
3. Testing of Safety systems to be done without DL connected – timeouts can disrupt results

## Progress Updates:

1. SATP does not require center, smaller O-ring (comes in kit)
2. More driver education needed by fleets on telltales to avoid unnecessary service events

**ABS Telltale(s)**

- Stability Control
- Traction Control
- Antilock Brake System
- Trailer ABS
- Hill Start Aid Disabled
- HOLD Hold Function

**Red Telltale(s)**

- Brake System Malfunction (SBSP/SATP)
- Low air pressure (SATP)
- Park Brake Set (SATP)
