New Mandatory Special Tools

DATE: February 09, 2026

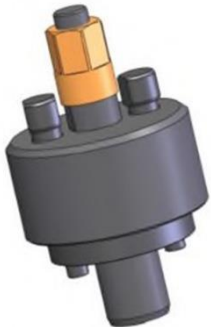

Attention Dealers:

Maserati has created eight new special tools. These tools are mandatory and will be listed in the ModisCS+ Special Tools Catalog. Please also note that this catalog lists all the special tools already in use that are compatible and required for vehicle maintenance. Therefore, it is important to check this section to ensure the tools are available in your workshop.

NEW TOOLS:

Front oil seal inserter V6 engines

This tool is required during the repair procedure to ensure the new timing cover oil seal is installed squarely and fully seated on V6 engines. **P/N: 900100024**

PicoScope Oil Cap Diagnostic Adapter – MHEV Engines

This oil cap adapter enables direct connection of a PicoScope to M182 MHEV engines. When used during diagnosis, it assists in detecting structural anomalies within the engine. **P/N: 900100047**

P/N: 900100041	
P/N: 900100042	
P/N: 900100043	
P/N: 900100044	
P/N: 900100045	
P/N: 900100046	

Connector Pin Extraction Tools

The tools shown provide the correct method for removing metal terminals from electrical connectors. Using these tools prevents breakage of the plastic connector housings by avoiding the need to force the terminals out.
