SCCM-25.AC.AD
"This software update contains the following key changes:
• We’ve improved the behavior of your vehicle's gear shift selector on the steering column.
• In some instances after this update, a ""Service vehicle soon"" wrench icon may appear in your instrument cluster and will remain visible until you dismiss it by pressing the ""OK"" button on your steering wheel, or it will clear automatically with the next ignition cycle. You may also receive a Ford App notification indicating service is needed on the vehicle. Please be assured this is a visual notification only and does not indicate any functional impact on your vehicle."
