

Subarunet Announcement

To: All Subaru Retailers

From: Subaru of America, Inc.

Date: February 5, 2025

UPDATE Safety Recall: WRA-24 ODS Sensor Replacement

*****PLEASE ENSURE THAT ALL SERVICE AND PARTS PERSONNEL ARE MADE AWARE OF THESE UPDATES*****

Phased Final Owner Notification

Subaru previously notified all affected vehicle owners of this recall with an interim letter on May 17, 2024 advising owners they would be re-notified with a follow up letter to schedule an appointment once parts are available.

As the parts supply arrives to support this recall, we will renotify affected vehicle owners in phases to schedule an appointment to complete this repair.

Listed below is the current phased final owner notification plan. Subaru retailers will be advised as each phased mailing is scheduled.

Mailing Date	Mailing Group	Current VIN status
February 3, 2025	All Legacy models	'Open'
May 19, 2025	2020 MY Outback (manual passenger seat)	'Open'
May 19, 2025	2020 MY Outback (power passenger seat)	'Open'
February 5, 2026	2021-2022 MY Outback	'Open'
Q2 2026 (estimate)	2021 MY Outback	'Open-Limited parts available' (to allow for repairs if an affected vehicle is presented for other services, prior to final owner notification)

VIN status

As phased final owner notification letters are released, the status of the VINs included in the mailing will be updated to 'Open' in the system. This status change will trigger system 'push' notifications, such as in-vehicle notifications, MySubaru alerts, and CareConnect messaging after the letters are mailed.

Service, Parts, and Claim Instructions

Please refer to the WRA-24 Product Campaign Bulletin for detailed service, parts, tools, FAQs, and claim submission information available on STIS.

Thank you for your understanding and cooperation as we work through this phased final owner notification process. If you have any questions, please reach out to your DPSM.

Background

Subaru of America, Inc. (Subaru) has initiated a safety recall for certain 2020-2022 model year Legacy and Outback vehicles to replace all (four) of the Occupant Detection System (ODS) sensors on the front passenger seat.

Description of the Defect and Safety Risk

The affected vehicles may be equipped with defective ODS sensors on the front passenger seat, which over time may result in a short circuit. If the short circuit occurs, the SRS airbag system warning lamp will illuminate, the front passenger's frontal airbag OFF indicator will illuminate, and the front passenger airbag may not deploy in certain crashes as designed, increasing the risk of injury to an occupant in the seat.

Remedy

Subaru retailers will replace all (four) of the ODS sensors on the front passenger seat with new ones at no cost to the customer.

Affected Vehicles

A total of 118,723 U.S. vehicles are affected by this recall, as listed below. Not all vehicles in the production range listed below are affected by this recall. Coverage must be confirmed by using the Vehicle Coverage Inquiry function on subarunet.com prior to repair.

Model Year	Carline	Production Date Range	Vehicle Count
2020-2022	Outback	June 16, 2020 – July 13, 2021	103,114
2020-2022	Legacy	June 16, 2020 – July 12, 2021	15,609

The WRA-24 recall coverage for the affected VINs not yet included in a phased final owner notification mailing will show an 'Open-Limited parts available' status until the final owner notification letters are mailed for those VINs. This status will allow for repairs to begin on those vehicles if they are presented for other services prior to final owner notification.

As phased final owner notification letters are released, the status of the VINs included in each mailing will be updated to 'Open' in the system to allow for repairs to be performed on those vehicles. This status change will trigger system 'push' notifications, such as in-vehicle notifications, MySubaru alerts, and CareConnect messaging after the letters are mailed.

Retailer Responsibility

Please be advised that it is a violation of Federal law for a dealer to deliver a new motor vehicle covered by a recall under a sale or lease until the defect is remedied. Therefore, any Authorized Subaru Retailer failing to perform the applicable service procedures to correct all affected vehicles in their inventory prior to the vehicle being placed in service may be subject to civil penalties of up to \$27,874 per violation (i.e., for each vehicle), as provided in 49 CFR §578.6 and will also be in breach of the Subaru Dealer Agreement.

Any vehicles listed in any recall/campaign that are in retailer stock must be:

- Immediately identified
- Tagged or otherwise marked to prevent their delivery or use prior to repair
- Repaired in accordance with the repair procedures outlined in the Product Campaign Bulletin
