## Title

Volvo Chassis - Debris In 13L Cooling Systems Filled With Extended Life (VCS2)

## Abstract

Observing debris within the cooling system is possible, with this debris potentially being dark and resembling sand. Such debris has the potential to cause blockages in both the heater core and oil cooler.

## Content

Published 13 February 2026

## Valid For

All Volvo models Built August 7, 2023 to August 12, 2024

Observing debris within the cooling system is possible, with this debris potentially being dark and resembling sand. Such debris has the potential to cause blockages in both the heater core and oil cooler.

- 1) Flush the coolant (per IMPACT 2609-11-03-01)
- 2) Install a new coolant filter, over flow tank, and fill with new coolant.

| Part Number | Description            | Qty |
|-------------|------------------------|-----|
| 23915461    | Expansion Tank         | 1   |
| 21937327    | (Volvo) Coolant filter | 1   |
|             | Coolant VCS2           |     |

Once the root cause has been determined a better short term and long term solution will be provided.
