Communication Type: News

Date: 2/10/2026

The quality team at Parker Hannifin has identified a visual flow line in the bowl material used in this part. The line can look like a scratch on the bowl. Parker Hannifin's engineering has tested and verified that the parts meet structural endurance and application requirements. **This is cosmetic only and does not affect fit, form or function of the part.**

ENGINEERING BULLETIN

Bowl Material Flow Line -

Visual material flow line

The quality team at Parker EMOE has identified a visual flow line in the bowl material used in multiple products. The line can look like a scratch on the bowl. Engineering has tested and verified they meet structural endurance and application requirements. This is cosmetic only and does not affect fit, form or function of the part.
