

ESPAR Heater

Topic Background:

- Trucks built with HS3 hydronic heaters & BPHVAC – June 2024 & later
- KEY OFF – Heater not activating when BPHVAC is turned on.
- Design change to HS3 operating circuit, power/activate circuit

Topic Resolution Information:

- Bergstrom SW ETA Nov 2025
 - SW is complete and field testing , programming trucks with DL this week
 - NOTE- issues is with Hydronic only intergraded into BPHVAC
 - 12/2/25 New SW available
 - Software update sent to update '23 and newer condos. Software part number submitted and will work through first one to confirm fix.

Progress Updates:

3 different workaround options to start ESPAR hydro heater

- Start with rear HVAC temp control at 'full cold', press 'park' button to start BPHVAC, then rotate temp knob to 'full hot'.
- With temp knob at any position, press 'park' button to start BPHVAC, then rotate temp knob to 'full cold' and then back to 'full hot' again.
- With the temp knob at any position except 'full cold', press 'park' button (twice) to cycle BPHVAC 'off' and then back 'on again.
