Involved Region or Country	North America
Condition	Some customers may comment that they have a "Forward Collision Unavailable" message accompanied by an Automatic Emergency Braking Amber Icon that intermittently comes on during startup and goes out a few seconds later. (In rare cases it may take up to 30 seconds for the message to go out). There will be no other symptoms and all systems operate normally.
Cause	None. Normal Characteristic.

Correction

None, This is a Normal Characteristic and no repairs should be attempted

Note: If additional symptoms are present, front-view camera features inoperative, or any current DTCs are found, proceed with standard SI diagnostics, as this PI does not apply.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, **DO NOT** assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
