Cause

When a new station change request is triggered, a temporary glitch is causing the Head Unit application to fail to overwrite the previous request. This glitch is causing the cover art mismatch in the Radio application.

Remedy

Please do not replace any parts.

The robustness measure has been identified and is planned for implementation in the A26/17 E505.9 software.

The E505.9 software is expected to be available in XENTRY Q3 2026.
