Onboard supply control unit J519 (Diagnostic address 0009) needs to be replaced after Guided Fault Finding or fault analysis is performed or due to a repair measure from a TSB.

After the control unit has been replaced, it is not possible to activate the new one correctly. Control unit activation with the workshop tester fails or the mileage cannot be written.

Technical Background

There is a system-related issue when writing data.

Production Solution

Optimized software for onboard supply control unit from week 20/2025.

Service

The following steps are necessary to write the mileage:

1. Make a note of the exact current mileage of the vehicle directly before replacing the onboard supply control unit.
Vehicles with unit set to miles: Please read out the mileage in the unit “kilometers” via measured values.
2. ODIS version (or higher):

- a. ODIS-S version: 24.1.1
 - b. Audi brand software version: 2024.08.00 / 2.34.8
 - c. Main feature 240101.201.60
3. Replace the onboard supply control unit using the ⇒ test plan “0009 - Replace control module”.
 4. During the replacement test plan, the token from the onboard supply control unit is displayed on the ⇒ vehicle diagnostic tester.
 5. Copy this token and paste it via the “Help - Support - Support request” button and send it to the manufacturer together with the previously noted mileage and the diagnostic log.
 6. When creating an ODIS Service support ticket, select Software error, Limited order editing functions possible and attach the current diagnostic session.

Until the token has been successfully written:

- You must not return the vehicle to the customer!
- You must not perform a road test!
- The mileage **MUST** remain the same until the token supplied by manufacturer is successfully written and the coding process completes.

7. Once the new token is received, copy and paste the token provided by the manufacturer from the ⇒ response to the support request into the following step in the test plan.
8. **Once the test program has been successfully completed, the mileage must be checked in the instrument cluster.**

Warranty

Claim Type:	<ul style="list-style-type: none"> • If the vehicle is outside of any warranty, this Technical Service Bulletin is informational only. 		
Service Number:	9710		
Damage Code:	0039		
Labor Operations:	GFF / Guided Functions	0150 0010	See SRT with associated operations
	GFF / Guided Functions	0150 0060	Time stated on the diagnostic protocol
Claim Comment:	As per TSB 2075086/2		

All warranty claims submitted for payment must be in accordance with the *Audi Warranty Policies and Procedures Manual*. Claims are subject to review or audit by Audi Warranty.

Please note the information on predecessors and items that are included and excluded in the repair operations, as well as any associated tasks.

Additional Information

All part and service references provided in this TSB (**2075086**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
