1

ECM-26.10.0

"This software update contains the following key changes:

- The original software in your vehicle previously did not perform as described in the Selective Catalytic Reduction System (SCR) section in your Owner's Manual and did not meet all regulatory requirements. Under specific driving conditions, your vehicle might not have operated as intended and emissions might have been affected. This software update corrects the regulatory concerns and allows the SCR system to perform as intended. This completes Emissions Recall 26E01. No further action is required."
