Maserati Coolant Fluid Color Change

IMPORTANT NOTICE This bulletin supersedes MAS005111 MTB 26-05 released on April 21, 2026. It includes updated information. Please discard all previous versions.

DATE: May 6, 2026

MODELS AFFECTED: ALL

Effective on or after March 1, 2026, the engine coolant color has been updated from **pink** to **purple**.

The previous **pink** coolant and the new **purple** coolant are fully compatible and may be mixed without affecting coolant quality, performance, or system behavior.

When the two coolant types are mixed, the resulting color may vary depending on the mixture ratio and may appear **pink, magenta, or purple**. This color variation is normal.

This condition is not to be considered a concern. No BOL report is required for this topic.

- The change is **strictly related to the dye only**; there is **no change to the coolant chemistry**.
- The **part number will not change** as a result of this update.
- The new coolant color **will not be released as a separate fluid**, and there will be **no new part number** associated with the color change.

The coolant remains functionally the same despite the color update.

For additional clarification, please contact Technical Service Operations.

Best regards,

TECHNICAL SERVICE OPERATIONS
