### B. Campaign Description:

Certain 2024-2026MY Sonata (DN8) and 2024-2026MY Sonata Hybrid (DN8 HEV) vehicles may exhibit intermittent battery discharge condition due to the air conditioning controller not fully powering down after the vehicle is turned off and parked. **Technical Service Bulletins (TSB) 26-01-051H & 26-01-052H** provide the procedure to update the ATCU (Air Temperature Control Unit) software; the revised logic improves controller shutdown to prevent battery drain and corrects a condition where the HVAC control display may appear blank when climate remote start is activated via Bluelink.

**Over-the-Air (OTA):** This update can also be conducted via OTA. Customers can complete on their own if they have an active subscription to Hyundai Bluelink. A visit to the dealership is not required. **Deployment of the OTA to Bluelink customers is planned to start the week of 07/13/26.**

### C. Campaign Document(s):
