Additional accessory P/N 900100196 for existing tool 900100024 for V6 Nettuno

DATE: July 20, 2026

Dear Partners,

We are informing you that tool p/n 900100024 has been updated with an additional component designed to improve the oil seal installation process on V6 Nettuno engines.

This added component helps ensure consistent, accurate positioning of the oil seal in its seat by compensating for dimensional gaps and seal tolerances. It also improves process reliability by helping maintain proper installation conditions, even when tool usage is not optimal.

Use of the V6 Nettuno oil seal add-on tool 900100196 together with tool p/n 900100024 is mandatory. When ordering tool p/n 900100024, p/n 900100196 must also be ordered.

Brief description of usage

Install the add-on between the tool and the oil seal, as shown in the figures below.

Installation view of 900100024 with 900100196

900100024 assembled with 900100196

Workshop Manual section 1.10 – 2 explains proper tool use and the requirement to use both tools together.

Please contact us if any additional clarification is needed.

Kind regards,

Technical Service Operations
