PHX-26.2.0.8

"This software update contains the following key changes:

Turn your parked vehicle into a theater with Google Cast. While parked, stream HD video on the center screen using your mobile device. Control playback via the screen or steering wheel. Requires an active Ford or Lincoln Connectivity Package. Available in U.S. and Canada.

You can now use your voice to access deeper vehicle settings and features, keeping your hands on the wheel and your eyes on the road. Try saying "Open Driver Assistance Settings" or "Enable CarPlay" to see how much easier it is to customize your drive. We'll continue to add more commands to the experience over time.

Unlock more from your vehicle with Kickstart. You'll now see a feed of curated tips and feature highlights directly on your touchscreen guiding you through everything your vehicle has to offer.

Managing your connected services is now simpler. Look for the new ""Upgrades"" menu in your Settings to see available features and manage your active subscriptions quickly from in the vehicle."
