PiUS Update Information

Software Version: 3.2

USA Only

Vehicle Type: All Porsche Vehicles

Subject: This PiUS software version is available online with immediate effect.

Information: This software is only intended for use with the Porsche Tester IV (PT4G)

Note: Regarding handling of the proprietary Porsche Tester IV software, we refer to Article 6 - "Transfer for use and assigned of rights of use" - of the Porsche PT4G Purchase and License Agreement, in particular the ban on duplicating the software or making it available to third parties.

 **Caution:** Download must not be interrupted!

 **Important:** During the entire update process, the PiUS server **must not be disconnected from the power supply!** Installation of the software update via Online Update only.

Work

Procedure: To install PiUS at your Porsche Center, the installation file available on the PPN Space must first be downloaded and saved locally on the workshop PC. Please install the 2 Microsoft Dot Net programs listed below before installing PiUS 3.0.

1. <https://dotnet.microsoft.com/en-us/download/dotnet/10.0> (Core Runtime)
2. <https://dotnet.microsoft.com/en-us/download/dotnet/10.0> (Desktop Runtime)

After the installation of the above programs please be sure to white list the following URL's in your network.

3. <https://cdn.ptes.porsche.com>
4. <https://s3.ptes.porsche.com>
5. <https://api.ptes.porsche.com>

To perform the installation, the saved installation file PiUS.Client.exe must be launched. The installation can be executed by a user with Windows admin rights. Therefore, if you lack the necessary permissions, please contact your IT manager to carry out the installation. If you have Windows admin rights, please follow the instructions of the PiUS Setup Manager.

Run apps - Runtime

ASP.NET Core Runtime 10.0.10

The ASP.NET Core Runtime enables you to run existing web/server applications. **On Windows, we recommend installing the Hosting Bundle, which includes the .NET Runtime and IIS support.**

IIS runtime support (ASP.NET Core Module v2)
20.0.26177.10

OS	Installers	Binaries

PiUS Update Information

Software Version: 3.2

USA Only

The PiUS software version(s) **3.2** is available online with immediate effect.

The following function(s) are now fixed or have been added:

- This update focuses on improving system stability and addressing issues reported by dealerships.
- As part of this update, we have resolved several issues affecting document printing through the PiUS Cloud Printer. These fixed address various printing problems, including cropped pages, ensuring that documents are now printed correctly.
- The PiUS update process has also been improved to ensure that updates install successfully even if PiUS is still running, providing a smoother and more seamless update experience.
- Additionally, this release includes further bug fixes, usability improvements and technical enhancements.

⚠ NOTE: Before downloading the new version, It is necessary to install the latest version of (10.x) ".NET DESKTOP Runtime" and "ASP.NET Core Runtime" in advance:

You find the download link here:

Important Notice:

Technical Bulletins issued by Porsche Cars North America, Inc. are intended only for use by professional automotive technicians who have attended Porsche service training courses. They are written to inform those technicians of conditions that may occur on some Porsche vehicles, or to provide information that could assist in the proper servicing of a vehicle. Porsche special tools may be necessary in order to perform certain operations identified in these bulletins. Use of tools and procedures other than those Porsche recommends in these bulletins may be detrimental to the safe operation of your vehicle, and may endanger the people working on it. Properly trained Porsche technicians have the equipment, tools, safety instructions, and know-how to do the job properly and safely. Part numbers listed in these bulletins are for reference only. The work procedures updated electronically in the Porsche diagnostic and testing device take precedence and, in the event of a discrepancy, the work procedures in the Porsche Tester are the ones that must be followed.
