00 Service info: info on engine oils of VW standards VW 504.00 and VW 507.00

Release date: Jul 27, 2026

Condition

Model(s)	Year(s)	VIN Range	Vehicle Specific Equipment
All Audi models	2010 – 2026	All	Not applicable

Workshop findings:

- Supply bottleneck for engine oil of VW standards: VW 504.00 and VW 507.00.

Technical Background

The current global supply situation for engine oils remains strained due to the conflict in the Middle East.

The main cause is the continued restricted availability of certain base oils necessary for the manufacture of established engine oils.

These developments don't just affect individual manufacturers, but the entire market along with the entire supply chain.

Only the engine oils of the following VW standards are affected: VW 504.00 and VW 507.00. Both engine oils are approved with viscosity 0W-30.

For the two oil types above the viscosity 5W-30 has also been temporarily approved.

NOTICE

The viscosity of the oil (5W-30) has no effect on the maintenance interval desired by the customer (fixed or flexible maintenance interval).

NOTICE

This measure is time-limited and serves only to maintain the parts supply!

Check specified engine oil type in the maintenance tables:

- Check in the maintenance tables which engine oil is specified for the vehicle and the desired maintenance interval.
- If an engine oil with VW standard VW 504.00 or VW 507.00 is specified for the vehicle and the desired maintenance interval and an engine oil with the viscosity 0W-30 is not available, then an engine oil with VW standard VW 504.00 or VW 507.00 with viscosity 5W-30 may be temporarily used.

Production Solution

Not applicable.

Service

Not applicable.

Additional Information

All part and service references provided in this TSB (**2082846**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
