

MITSUBISHI MOTORS NORTH AMERICA, INC.
4031 Aspen Grove Dr, Franklin, TN 37067

July 8, 2026

To: All Mitsubishi Dealer Principals, General Managers, Service Managers & Technicians

Subject: High Voltage Safety V2 Training Now Available

Mitsubishi Technical Training has launched the second edition of the High Voltage Safety online course (High Voltage Safety V2), which is now available.

This training is required for all service technicians, shop foremen, and service personnel who may come into contact with high-voltage systems. It applies to current and upcoming models, including Outlander Plug-in Hybrid, Outlander equipped with a 48V battery, and Eclipse Cross Sportback.

As part of MMNA's ongoing commitment to supporting dealer partners, this training reinforces essential technical knowledge and safety practices. It is designed to ensure that technicians are properly prepared to service vehicles safely and effectively, contributing to accurate, first-time repairs.

The course provides critical information on high-voltage system safety and is a required component for all applicable service personnel. As such, this course will be included in the Technical Dealer Core Courses Certification.

Thank you for your attention to this matter.
