

2024-2026 MY Nautilus

Accessory Protocol Interface Module - PHX

PHX-26.2.0.11

Safety Recall 26S51 and Digital Experience Update 2.0.11

Accessory Protocol Interface Module (APIM)

As a reminder, ensure you have a recurring Software Update schedule set in order to receive important updates for your vehicle. Visit the Software Update settings in-vehicle or on your mobile app.

1

PHX-26.2.0.11

"For Nautilus Hybrid vehicles only:

Once successfully installed, Safety Recall 26S51 repair will be complete. No visit to the dealership is required. If you have already scheduled an appointment for this repair, you may now cancel it.

Hybrid vehicles can run quietly at low speeds, so your vehicle is equipped with a Pedestrian Alert System that produces a sound to help pedestrians know it is nearby. On your vehicle, a fault in the audio system can sometimes prevent this alert sound. If this happens, you will see a ""Pedestrian Sounder Fault, Service Now"" message on your Instrument Panel Cluster.

Ford Motor Company updated the software in your vehicle's Accessory Protocol Interface Module (APIM) to address this concern.

For All Nautilus Vehicles:

Unlock more from your vehicle with Kickstart. You'll now see a feed of curated tips and feature highlights directly on your touchscreen guiding you through everything your vehicle has to offer.

Look for the new ""Upgrades"" menu in your Settings to see available features and manage your active subscriptions quickly from in the vehicle."
