

Over the Air System Updates

August 31, 2026

Version 3

2025 Civic Si: Software Update

Supersedes version 1 to revise the information at:

CURRENT SOFTWARE VERSIONS AVAILABLE FOR DOWNLOAD

INTRODUCTION

Vehicles equipped with the System Updates application are capable of downloading and installing Over the Air System Updates (OTA). A connection to a Wi-Fi network is needed to perform the update over the air.

System Updates contain upgrades that fix operational errors and/or provide a variety of enhancements, which adds new functionality. Information for the various software releases can be found in this document.

This update is intended to resolve the following issues:

- Some HondaLink features stop functioning due to the telematics unit entering a "deep sleep" power saving mode.

Version 8B010-T20-A240

Initial Release.

UPDATE PROCEDURE

Do I need to connect to Wi-Fi?

Most System updates are delivered over the air through the Telematics Unit (TCU) cellular connection. This icon shows the TCU cellular connection strength of the audio unit display. 

It may be necessary to connect the vehicle to a Wi-Fi network if the vehicle does not have a Telematics Unit (TCU), or if the vehicle is in a location with poor cellular reception. Some System Updates may require a Wi-Fi connection and will alert you if one is required.

To connect to a Wi-Fi network, follow these steps:

1. Go to the HOME screen on the audio display screen.
2. Select **General Settings**.
3. Select **Connections**.
4. Select **Wi-Fi**.
5. Select **Change Mode**.
6. Select **Network**.

NOTE: When you change the mode from Smartphone Connection to Network, a pop-up appears; select **Confirm**.

7. Select the desired Wi-Fi network.

NOTE: To download updates automatically, check to Use this network to automatically download system updates.

8. Select **Connect**.

NOTE: Connect will appear after a password is entered if required.

9. Press the HOME button to return to the home screen.

How do I check for an OTA System Update?

Follow these general steps to check for an Over the Air (OTA) System Update. For detailed instructions, please consult the owner's manual.

1. Go to the HOME screen on the vehicle display audio screen.
2. Select the **System Updates** app.
3. Select **Check** for updates.

Will I lose any functions during the update?

Some functions will not work during the update process. It is recommended that you do all updates while parked in a safe location.

Can the dealer perform the OTA update for me?

Yes, you can schedule an appointment with your dealer to complete the OTA update.

Consult the Owner's Manual for more information.
