Software Update - Open On Approach

Body Control Module (BCM)

As a reminder, ensure you have a recurring Software Update schedule set in order to receive important updates for your vehicle. Visit the Software Update settings in-vehicle or on your mobile app.

1

BCM-26.DC

"This software update contains the following key changes for Platinum trims of the Explorer:

- A previous update which intended to enable the Open On Approach feature may not have fully activated the functionality. This update addresses that issue. Along with this feature, you may notice a change in your vehicle's lock sound from a horn honk to a beep sound.

Here's how the new Open on Approach feature works:

- To enable, go to the Power Liftgate controls within the Vehicle Settings menu on your center touchscreen. Once enabled, stand approximately 3 feet (1 meter) behind the center of the vehicle with the key fob for up to 4 seconds. The tail lamps will flash and the vehicle will beep before the liftgate opens."
