ECG-26.2.12.3

Software Update 13 - Central Computer

Enhanced Central Gateway (ECG)

"* Updates initiated from the Install Now feature in the app require the vehicle to be parked with the ignition off during installation. Most non-drivable updates are completed within 30 minutes or less, while others may take longer. Look in the mobile app for specific estimates before installation.

As a reminder, ensure you have a recurring Software Update schedule set in order to receive important updates for your vehicle. Visit the Software Update settings in-vehicle or on your mobile app."

1

ECG-26.2.12.3

"This update improves the overall system and lays the groundwork for upcoming software improvements to your touchscreen and connectivity modules.

What's New:

A new way to manage your vehicle's software has arrived in the mobile app. You can now be notified that a scheduled update is ready for your vehicle. When notified, use the "Install Now" button in the app to initiate the installation process.*

We've refined how software updates download, install, and resume after an interruption."
