Service Action Notification-Reminder
30 Oct 2026

Title	Text	Short Text	Pop-Up
Service Action: DSC Hydro Unit	The DSC hydro unit and the brake line threaded connections should be checked and, if necessary, replaced. In some cases, a protective film on the hydro unit might not have been completely removed before the brake lines were screwed into place. This can lead to a slow loss of brake fluid from the threaded connections. In this case, you will be alerted at an early stage by a red Check Control message stating “Brake system defective. Stop carefully. Do not continue driving. Call BMW Roadside Assistance”. However, there is no functional limitation of the brake. Contact authorized BMW center at your earliest convenience to get your vehicle repaired for FREE. Dealer locator: bmwusa.com/dealer.	Service Action: DSC Hydro Unit.
