Service Campaign T3S Dealer Best Practice

Date: March 7, 2019

Attn: Dealer Principal/General Manager/Service Manager/Parts Manager

Subject: Service Campaign T3S: HC DTC P0128 ECU Update (TSB #19-01-008H)

Updates To This Document	Date
<ul style="list-style-type: none"> Service Campaign T3S Launch 	03/07/2019

IMPORTANT Dealer Stock and Retail Vehicles

Dealers must perform this campaign on all affected vehicles prior to customer retail delivery and whenever an affected vehicle is in the shop for any maintenance or repair. When a vehicle arrives at the service department, access Hyundai Motor America's "warranty vehicle information" screen via WEBDCS to identify open campaigns.

Affected Vehicles

Hyundai has launched a Service Campaign to update the ECM (Engine Control Module) for 2019 Model Year Accent (HC).

The affected vehicles include:

- 2019 MY Accent (HC) vehicles.

Hyundai is initiating this action to ensure the quality of its vehicles and the continued satisfaction of Hyundai customers.

Description

This bulletin provides information related to an ECM (Engine Control Module) software update for DTC P0128 "Coolant temp Below thermostat regulating Temperature" logic improvement.

There are no drivability symptoms associated with DTC P0128.

Service Action

Reservation – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and advise the customer on time requirements.

Readiness – Review this announcement and the accompanying FAQs with all Service and Parts staff including Reservationist/BDC. Also, complete all applicable training, check your reservation capacity settings (you can set separate capacities for every recall/campaign), confirm email addresses for campaign appointments, and that you have all necessary tools, campaign parts and shop equipment as needed.

- This campaign can be completed quickly and does not require a hoist.

Reception – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and print a copy for technicians. Provide SRC or an alternative vehicle, as needed. If a customer has declined the campaign, note this on the repair order and request the customer's signature next to the statement.

Repair – Always plug in the GDS before starting the repair. Make sure to complete an MPI on all vehicles and Quality Control your work.

- This campaign requires the vehicle's battery voltage to be above 12 volts for software update to be performed. You can maintain vehicle battery voltage by connecting a charger to the battery or operate the vehicle in Ready mode for at least 20 minutes to ensure an adequate battery state of charge for reliable update results.
- Check for Diagnostic Trouble Codes in ALL menus and erase any DTC after software update is complete.
- Erase the DTC in the BlueLink system according to TSB 12-BE-005-2.

Hyundai
Assurance Car Care

Return – Review all completed campaign and repairs to answer any customer questions. Also, schedule the customer's next service.

Reconnect – Follow up for customer satisfaction.
